DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance: a method and apparatus for signal transmission are disclosed. The closest prior art Cordell et al, US patent no. 6,169,887, disclosed similar method and apparatus. However, Cordell does not teach or fairly suggest, in combination with the other claimed limitations the limitations of "third means for selectively preventing detection by said second means of a subsequent signal employing said code", as recited in claim 1, the limitations of "third means for selectively delaying said encoded signal beyond said search window prior to decoding by said second means", as recited in claim 15, the limitations of "third means for selectively delaying said encoded signal beyond said correlation window", as recited in claim 16, the limitations of "employing said cryptographic code to detect said signal after a predetermined delay after receipt of said signal via a second means, said predetermine delay sufficient to prevent detection by said second means of a subsequent signal employing said cryptographic code", as recited in claim 17, are neither anticipated nor rendered obvious by Cordell.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
